Professional Summary

Full Stack Developer with hands-on experience designing, building, and shipping scalable, responsive, and performance-optimized web applications using **React.js, Node.js, and Python**. Proven ability to architect and deliver end-to-end solutions — from dynamic, accessible React frontends to robust backend systems and REST APIs. Experienced in building AI-integrated platforms, custom web scraping pipelines, and automation systems that eliminate manual workflows and drive measurable efficiency gains for businesses. With a professional background in international B2B communications, brings a strong client-facing dynamic to technical teams, comfortable managing B2B operations, cross-functional coordination, and project delivery across US/European time zones.

Technical Skills

Frontend: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Material-UI, Tailwind CSS, Responsive Design

Backend: Python (FastAPI, Django), Node.js, Express, REST APIs, PostgreSQL, SQLite

AI & Automation: AI Model Integration (OpenAI & Gemini APIs), LLM-Based Automation, Custom Data Extraction Engines, Selenium, Puppeteer, Scrapy

Languages: JavaScript, TypeScript, Python, C/C++, SQL

Testing & QA: Manual & Functional Testing, REST API Testing (Postman), Selenium (UI Automation), SQL-Based Data Validation, Bug Reporting & Defect Tracking, SDLC & QA Concepts

Tools & Platforms: Git, GitHub, VS Code, Android Studio, SAP, Postman, Docker, Jira, Figma

Concepts: Data Structures & Algorithms, OOP, Full Stack Architecture, API Integration, Performance Optimization, Agile/Scrum, Software Quality Assurance

Personal Projects

AI-VIS — AI Video Interview System

React.js, Django REST, Python, AWS, Docker, AI/LLM Integration

- **Full-Stack Architecture:** Built a scalable recruitment platform with a React.js frontend and Django REST backend, supporting distinct user roles for HR teams (job posting, pipeline management) and candidates (application, scheduling, interview).
- **Intelligent CV Screening:** Engineered a CV-parsing engine that extracts and validates candidate qualifications against job descriptions, autonomously filtering and routing only relevant applicants into the interview workflow.
- **Automated Scheduling:** Implemented a 24/7 self-service interview scheduling system, eliminating manual HR coordination and allowing candidates to book slots at their own convenience.
- **AI Interview Engine:** Developed a real-time video interview module powered by LLM integration (OpenAI/Gemini APIs) that dynamically generates context-aware, role-specific questions tailored to each candidate's CV and job description.
- **Multimodal Analysis:** Integrated computer vision and NLP models to perform live facial emotion detection and voice sentiment analysis throughout the interview, capturing objective behavioral signals beyond verbal responses.
- **Automated Evaluation & Reporting:** Built a post-interview dashboard that aggregates multimodal data into structured candidate scorecards, delivering a **40% reduction in hiring bias** and a **30% increase in HR screening efficiency** during internal testing.
- **QA & System Testing:** Conducted end-to-end functional testing across all user roles (HR and candidate), performed REST API validation using Postman on all Django endpoints, and used SQL queries to verify data integrity of parsed CV records and interview results in the PostgreSQL database. Tracked and resolved defects through structured bug reporting throughout the development lifecycle.

Moons Burger E-Commerce Platform

React, FastAPI, React Native Expo 56, Gluestack v5

- Developed a comprehensive digital commerce system for a UK-based food business, comprising a custom web platform (React/FastAPI) and a high-performance cross-platform mobile app (React Native/Expo).
- Implemented visual menu management, multi-status live order tracking, and an integrated POS/admin flow with a bold, brand-consistent design language to enhance user engagement.

Work Experience

Project Coordinator & B2B Operations Specialist

Jan 2023 – Present

UA Communications

- **Lead Generation & Growth Engineering:** Engineered multi-channel lead acquisition pipelines across diverse high-value sectors, including energy, telecommunications, and commercial real estate.
- **Performance-Driven Sales:** Achieved strong conversion rates for major US-market utility and telecom providers — including National Gas & Electric, Green Light and Energy, AT&T, Frontier, T-Mobile, and Verizon — by managing complex inbound pipelines to drive direct revenue growth.
- **Strategic Market Penetration:** Executed targeted lead generation and cold-calling campaigns for specialized industries; notably partnered with a broker at First Choice Business Brokers to identify and qualify warm leads — specifically CEOs looking to exit or sell their businesses.
- **Enterprise Account Management:** Managed appointment scheduling for high-profile visual feeder campaigns including WWE SummerSlam, MLB All-Star Weekend, and Formula 1.
- **Operational Optimization:** Delivered lead generation services for RAI Media, cost segregation auditing firms, and Supreme Maintenance Organization, while concurrently managing property acquisition leads for local real estate investors.

Education

Bachelor of Science in Computer Science

Oct 2021 – July 2025

University of Central Punjab, Lahore

Relevant Coursework: Data Structures & Algorithms, Databases, OOP, Operating Systems, Machine Learning, Computer Networks, Information Security

Certifications

Certified Cloud Applied Generative AI Engineer — PIAIC

- Custom GPT Development
- OpenAI & Gemini API Integration
- Full-Stack AI Applications with Python
- Cloud Deployment (AWS / GCP)
